

## **Carboxy methyl polymer**

Qty ton  
**1000**

- **Carboxy Methyl Polymer –LV According to O.C.M.A specification D.F.C.P 2 for CMC LV , free flowing powder & free from lumps.**
- **Solubility : at any temperature in fresh and saturated water base mud.**
- **Stability : stable in fresh mud with temperature 125 C° .**
- **Storage : Can be stored for two years under temperature (-10 to 50) C°**
- **Moisture : 6% max.**
- **Samples : two separated Samples each 1/2Kg for Lab Test .**
- **The material should be non toxic .**
- **Relevant technical sheet should be enclosed with the offer .**
- **Packing : The material should be packed in sacks containing 25kg net weight the sacks construction should be 5ply at least one ply suitably waterproofed . each 40sacks should be on good wooden pallet covered with poly ethylene .**
- **All necessary data shall be sent with shipment .**
- **Shipment : Inside container .**
  
- **Representative of bidders should present on testing of their Proposal samples performing by the members of the Syrian petroleum company specialist commission in the jhissa fields laboratory. In case they will not present so they have no right to object on the results of testing their proposal .**
