**PERMENANT ANNONCEMENT FOR COMPANIES  
PRODUCING DEMULSIFIERS AND ANTI CORROSIONS  
USED IN OIL FIELDS**

---

Syrian petroleum company would like to announce its desire for companies that produces anti corrosion and demulsifiers to participate for carrying out laboratory and field trials in SPC oil fields at Jbisseh and Al Hasakeh directorates .

- In case a company would like to participate in this announcement , they should submit a request for participation to SPC administration .
- The company should send , on its account tech. representatives to carry out laboratory tests on its material at the oil field laboratory . They should bring with them the necessary equipment and devices needed for these tests and they should choose the best of its material that suits each field and give their recommendation in this respect .
- SPC will help in showing the way to the sites and provide place to carry out the tests and coordinate for bringing and supplying samples for participant companies.
- The anti corrosion should be able to protect the facilities and reduce the corrosion in the equipment of producing and transporting the oil in fields and the protection ratio should be the largest possible protection ratio starting from the beginning of the pump till its end .

As for Demulsifier : it should be with the least rate of water in crude sent from stations and with least rate of oil in water separated from tanks and separators.

Knowing that the special tender books will include the required rates aforementioned .

Participant should be responsible about performance steadiness of his products and materials to be in accordance with all pumped chemical materials , no sediments are formed in facilities and material not effecting health of labors.

Technical tender books related to fields and announcements will include all conditions and specification related to demulsifier , anti corrosion and dates for carrying out laboratory and field trials for them.
